EXPERIENCE

Zurich, Switzerland

NOW

Nov 2024 – Dec 2025

Basel, Switzerland

AHDIS

Senior Healthcare Interoperability Specialist

Conceptual work creating specifications with FHIR implementation guides in the context of SwissHDS. Consulting related to Digital Health for customers and projects. Technical project management of Digital Health projects and support for SwissHDS/EPR integration projects. Collaboration on Digital Health seminars, Projectathons and Connectathons. Software development on the open source suite from AHDIS and its partners: matchbox and mobile access gateway.

Roche

Knowledge Engineer

Responsible for the interoperability layer in the Data Architecture department of Roche Diabetes Care. Collaborated with product teams to shape the development and integration of data models and standardization into the RIS product portfolio, enabling FAIR data services. Drove adoption and integration of interoperability standards including terminological resources for RIS digital products. SAFE development environment, building interoperability solutions while adhering to security protocols and regulatory compliance policies.

Mar 2024 – Nov 2024

Madrid, Spain

Fresenius Medical Care

Data & Connectivity Manager · Security Responsible

Designed and managed national interoperability strategy covering 45+ dialysis clinics. Identified potential interconnections between referral hospitals and clinics. Evaluated and set up requirements with stakeholders to promote interoperability in future tenders. Responsible for managing vendors, external contracts and project delivery. Led the design and implementation of a Security Management System and coordinated a successful external audit for the Spanish National Security Framework (Royal Decree 311/2022) certification, passed on the first attempt.

Oct 2022 – Mar 2024

Madrid, Spain

Dedalus Healthcare

Healthcare Interoperability Specialist

Defined and implemented the Hospital Information System (HIS) interoperability strategy in a product that covers 130+ care centers in 3 countries and 5 million+ clinical records. Coordinated architecture and development teams. Analysed and documented client requirements, designed interoperable solutions, and maintained the clinical concept catalogue. Designed and developed FHIR Implementation Guides and HL7 V2 integrations in Enterprise Service Bus (InterSystems IRIS HealthShare).

Jun 2022 – Oct 2022

Madrid, Spain

Fujitsu

Healthcare Interoperability Specialist · R&D Engineer

Defined and implemented the genetics product interoperability strategy. Led FHIR Implementation Guide design for Laboratory Information Systems and Hospital Information Systems. Built FHIR and HL7 V2 integrations in Java for ordering tests and generating interoperable reports.

Oct 2021 – Jun 2022

Madrid, Spain

Atos

Healthcare Interoperability Specialist · R&D Engineer

Defined and implemented chronic disease management interoperability strategy for ASCAPE European Project and RESAMPLE European Project. Built FHIR in Java for Artificial Intelligence integration.

Mar 2020 – Oct 2021

Madrid, Spain

Grupo Miranza

Technical Lead VEMoS · R&D Engineer

Technical lead for the VEMoS European Project. Developed a clinical trial platform and refractive surgery simulation prototype in ophthalmology. Full-stack development in Vue.js and Java (Spring Framework). Signal analysis expert in aberrometry and spectral analysis based on the Fourier Transform. Biophysical modeling of biological surfaces and ray-tracing simulations. Responsible for project delivery, vendor management and European Commission reporting.

Mar 2019 – Dec 2019

Valencia, Spain

Indra Minsait

Full-stack Software Developer · R&D Engineer

Back-end development in Java and front-end in Sencha Ext.js for a Pharmacy Information System.

KEY PROJECTS

- 01

FHIR® Implementation Guide Swiss Federal Office of Public Health (FOPH)
FHIR Implementation Guide for the Elektronische klinische Meldung (Electronic Clinical Notification for infectious diseases).
HL7 FHIR FSH Clinical Terminologies
- 02

FHIR® Roche Diabetes Care Implementation Guide
FHIR IG supporting interoperability for the Roche Diabetes Care RIS portfolio, enabling FAIR data services for medical devices and digital health products.
HL7 FHIR Clinical Terminologies
- 03

FHIR® Implementation Guide with Open Source Tools
End-to-end FHIR IG development using FSH language, sushi compiler, IG Publisher with Docker integration.
HL7 FHIR FSH IG Publisher Docker
- 04

Interoperable Platform for Monitoring Patients with Obesity
Web platform integrating Spring, Angular, and FHIR Azure Server for remote patient monitoring in obesity management.
HL7 FHIR Java · Spring Angular
- 05

Classifying Pathologies Using Acoustic Voice Analysis
System classifying pathologies through acoustic voice analysis using machine learning.
Python TensorFlow Scikit-learn
- 06

IEEE 11073 Bluetooth → FHIR Personal Health Devices Gateway
Health gateway on Raspberry Pi bridging medical devices with health systems via IEEE 11073 Bluetooth → FHIR conversion.
HL7 FHIR Raspberry Pi Java · Spring

SCIENCE COMMUNICATIONS

- 2019

JOURNAL ARTICLE
Business Process Management for optimizing clinical processes: A systematic literature review 
De Ramón Alberto, Ruiz-Fernández Daniel, Sabuco García Yolanda · Health Informatics Journal
- 2023

CONGRESS
Classifying pathologies using acoustic voice analysis 
Annual Congress of the Spanish Society of Biomedical Engineering
- 2023

SYMPOSIUM
Binary classification by voice using machine learning in the Saarbrücken Voice Database 
TRANSFORM4EUROPE Doctoral Symposium · University of Alicante
- 2022

MASTER'S THESIS
Interoperable platform for monitoring patients with obesity 
School of Computer Systems Engineering · Technical University of Madrid
- 2021

BACHELOR'S THESIS
FHIR Interoperability in Personal Health Devices (PHD Bluetooth profile, ISO 11073 and FHIR) 
Polytechnic School · University of Alicante
- 2015

CONGRESS
FGF8 contribution in the specification and differentiation of the hypothalamus 
16th National Congress of the Spanish Society of Neuroscience · Research Intern, Institute of Neurosciences (CSIC-UMH)

RESEARCH & ACADEMIC OUTREACH

Research Intern | Experimental Embryology Laboratory

Institute of Neurosciences (CSIC-UMH), Alicante, Spain · Summer 2014 & Summer 2015 (6 months total)

Academic and Teaching Experience | Telemedicine & Biomedical Engineering

Invited by the University of Alicante in 2024 and 2025 to give a series of talks to Biomedical Engineering students on challenges in implementing interoperable systems.
